A DESERVED SUCCESS.

OUR NEW LEDGER PATTERN has been adopted by business houses in all parts of the country.

ITS ADVANTAGES CAN BE READILY SEEN.

FIRST—The two columns are in the center of the book side by side. You do not have to look from center of page to the center of book in order to see the difference in the footings, but the footings are side by side and you can see at a glance the difference between them.

SECOND—Both columns are in the center of the page, so that on the credit side you do not have to write in the fold of the book, but both columns lie on a perfectly flat surface. This alone is a very great point to bear in mind.

THIRD—I make all of my books of **Weston's** paper, which, added to good binding and covers, opening flat, and beautiful ruling (no skipped lines), makes about as perfect a ledger as can be found in the **World.**

CHEAPEST AND BEST SECURED LIFE INSURANCE.

NORTHWESTERN

Mutual Life Insurance Co.

M. D. L. HAYES, - General Agent.

Rooms 19 and 20 Elwood Building, - Rochester, N. Y.

ITS CHIEF ADVANTAGES ARE SECURITY AND CHEAPNESS.

1. The Strongest of the Five Largest Mutual Companies—as shown by ratio of surplus to liabilities.

2. The Cheapest of all Companies,—its dividends larger than in any other company, and at present *nearly double those of several of the most prominent ones.*

3. The Safest of all Companies—its location enabling it to make the safest investments, and at a far higher rate of interest than any of its competitors. The company realizing six per cent. interest can return, in the dividend, twice the surplus interest of the companies realizing but five per cent. *This advantage of location has enabled the Northwestern Mutual to pay all its death claims, taxes and expenses for the past ten years from its interest income*—no other company's interest doing this for one year—besides increasing its ratio of surplus to liabilities from 16.6 (N. Y. Reports, 1871-82) to 28.3 during the past eleven years, showing that its immense dividends have in no way impaired its strength—**interest being the chief factor of cheapness as well as safety in life insurance.**

Hemlock Lake Water Ice,

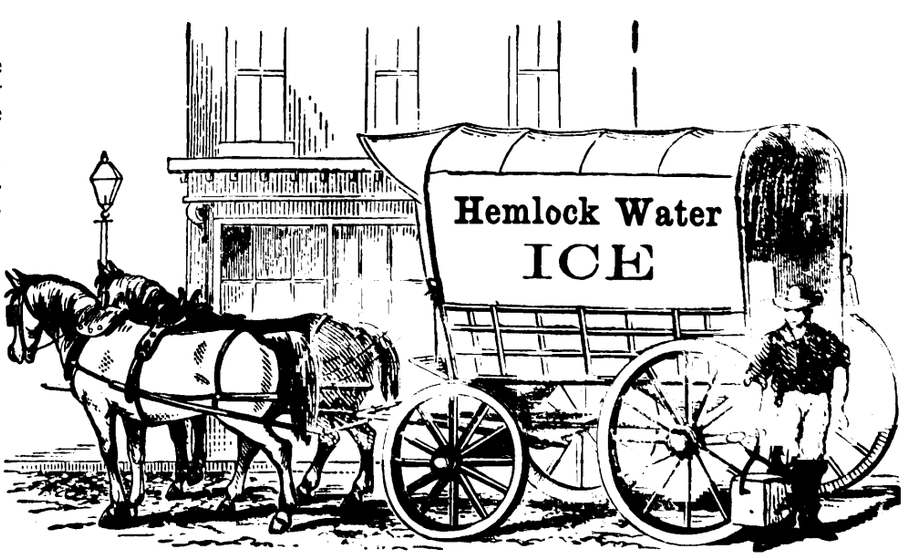

FROM KONDOLF LAKE, MONROE AVENUE.

TO THE PUBLIC.

The Kondolf Lake and Ice Houses were erected at a very large expense, for the purpose of procuring Pure Ice.

Everybody is aware that nearly all the ice sold in Rochester, is from the Canal, Widewaters, Quarries, Stagnant Ponds and River Waters.

This Lake is supplied with Hemlock Lake Water, by a pipe which is continually running, and there is in consequence a constant overflow at the outlet, on the opposite side of the Lake, which keeps it as pure as the water in the Reservoir at Mt. Hope. Therefore we ask your patronage, as the ice is sold and delivered as cheap as other ice.

Orders received at 170 Oak St., and at E. McSweeney's, 123 East Main St., by Mail and Telephone.

Respectfully Yours,

KONDOLF BROTHERS.

The Rochester Brewing Co.

Has been in existence but eight years, and is provided with all the latest improvements known in the manufacture of

LAGER BEER.

The Company is now selling OVER 75,000 BBLS. PER ANNUM, and as a matter of fact is the only Brewery which can show such progress in so short a time. The great and growing increase in its sales is the best evidence of the excellent quality and purity of its product. Recognizing its worth, Physicians, almost without exception, recommend its use to their patients, and as a consequence family trade has grown to immense proportions.

In connection with our Brewery, we have established a

BOTTLING DEPARTMENT

And are ready to promptly fill orders for our

EXPORT, BOHEMIAN, BAVARIAN, AND STANDARD LAGER BEERS.

Our uptown depot is at

Mr. E. H. HIGGINS', 6 and 8 State Street,

And orders left with Mr. Higgins will receive the same prompt attention as if sent direct to the Bottling Works.

Our goods can also be had at the East Side Establishment of

Mr. GEO. J. LUTT, cor. CLINTON and EAST MAIN STS.

Knowing that the superior quality of our goods is our best advertisement, and assuring our customers of their getting only a pure, healthful and nutritious article we hope for a a liberal share of public patronage.

Very Respectfully,

We are manufacturing a pipe that is indestructible from the action of all the elements, impervious to the action of acids, gases and steam, all of which are found in corporation sewers These pipes are made from a combination of superi or clays, which, by powerful machinery, are rendered uniform throughout—pressed from a steam press, under a pressure of *sixty-three tons* upon each pipe, it is made very compact; and burned in close kilns at a very intense heat, it becomes a thoroughly vitrified and iron like body. All prominent architects, builders, and all those who have investigated the subject of sewerage, have become convinced that properly burned clay pipe is the only material suitable for underground drainage, and that the sewer and drain pipe manufactured from cement, carbonated stone, and other similar materials, are liable to and do *decay*, *disintegrate*, and become *worthless*, as has been many times proved by the officials in many cities.

These vitrified pipe are suitable for well tubing; are *better than stone or brick*, because cheaper, more durable, and can be made perfectly tight.

☞ We deliver our pipe within the city limits Free of Charge, and in good condition.

Some of the points necessary to call attention to, are: First, a movable back and front, which throws off the spring in the leg. Second, it has an advantage in the use of the foot, hanging or unhanging, i. e., it can be used with a hanging foot, and it can be used the old way by putting the foot into the boot and then into the toe. Third, it is simple, durable, solid and easy to work.

What the People say who Have Used the Shipman Engine.

GRANT, N. Y., July 8th, 1884.

Mr. A. H. Shipman:

DEAR SIR:—The No. 2 Engine is a perfect little giant. I run a turning lathe, scroll saw and drilling machine one at a time with 55 lbs. of steam. Two gallons of oil runs it ten hours.

A. G. MILLER, Grant, N. Y.

MR. GEO. D. REED, ATTORNEY AT LAW, 6 ATWATER BLOCK, CANANDAIGUA, N. Y., says in his letter of June 29th:—"You may refer any of your customers to me and give them the facts that I have a row boat that I have decked over and put an awning on; boat is 17 feet long over all, 4 feet 3 inch beam, and I can carry 4 in it and run it 5 miles an hour and keep it up."

PROSPECT, OHIO, July 10th, 1884.

A. H. Shipman, Rochester, N. Y.:

DEAR SIR:—In regard to the engine I received from you I have been testifying in its favor ever since I got it to going in my office. Mr. J. C. Titus, a practical machinist, came from Marion last week and he and I opened the engine to see the inside of it, and found it entirely satisfactory, more so than either of us expected, as to strength and workmanship. I have been using the engine every week since I got it, and the more I use it and become acquainted with it, the better I like it. I would not take double the money and do without one.

Yours respectfully, H. R. CLOWES,
Editor and proprietor of the *Prospect Monitor.*

SPECIAL } July 7, J. C. Titus, of Marion, Ohio, mentioned in Mr. Clowes' letter, ordered from us 3 engines, and requested us to draw on him with Bill of Lading.

THE
JOHNSTON HARVESTER CO.,
OF BATAVIA, N. Y.

THIS COMPANY have for many years built and put upon the markets of the world their peculiar MACHINES FOR CUTTING GRASS and HARVESTING GRAIN, which have from the beginning taken the FIRST place among all those manufactured for that purpose. They have been tested by Scientific Machinists, by casual observers, and by Practical Farmers, and always with one and the same result, namely:

The First Award for Excellence of Workmanship and Quality of Work Done in the Field.

This Company can show probably the greatest display of ***Gold Medals*** and ***First Prizes*** of any establishment in the trade; on account of the Excellent Workmanship of their Machines and their Universal Success in the field against all their competitors, and before the most experienced Committees and Societies under Royal auspices in foreign countries, and the most Competent Judges in America.

In addition to their regular line of Harvesting Machinery, the JOHNSTON HARVESTER COMPANY now offer the most Complete and Successful ***Self-Binder*** in the Market. It took the ***Grand Prize*** at the Great Trial before the Royal Agricultural Society of England at Derby, in August, 1881. A cut of this Machine is herewith shown, and so great is the demand for it, that with all the immense capacities of the Company, they are unable to supply half their orders.

Farmers desiring this Excellent Machine need to send their orders early for 1885, to insure their supply.

Our Binders use ***Twine*** only, the advantages of which over wire, are obvious to all.

Every pains taken to please our customers.

The aragon School Desks are the **Latest Improved and Best Desks now Manufactured.** They are the only ones having "Solid Backs" and "Solid Seats," made so by being **Double-Tongued, Grooved and Glued Together,** and **are finished as one piece** by machinery, and are not shipped as **"bundles of loose slats."**

The wood work is fastened to the iron by the Patent "Expanding Iron-wedge Dove-tail," and can never get rickety by the action of heat or cold, nor by school usage.

The seat cannot "fall with a slam," being sustained by a friction STEEL SPRING.

No Rubber in the Hinges! No Screws or Bolts to get loose! No loose slats to warp and get rickety, nor no loose slat dovetails to split off!

The Rochester Gas Light Co. supplies all the Coal Gas Used on the WEST side of the Genesee River.

PRICE, $2,10 per thousand feet; or, if paid before the 10th of the month, $2.00.

TO CONSUMERS.

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day, or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle Face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by ten for every additional face.

TO TELL THE STATE OF THE METER.—Look at the *left hand* face of the Index and set down the figure of *least* value next the hand, which on the diagram is *1*. Next look at the *middle* face, and as before set down the figure of the *least* value next the hand, which on the diagram is *3*. Next upon the *right hand* face, take the same relative figure, which is *5*, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13,500 is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at *that* time from the *present* state, and you have the amount consumed in the interval.

☞In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's office, No. 62 Mumford Street. At night ring the carriage bell on Mumford street.
