(A) Date of Rochester's incorporation as a city. The city charter occupying eighty-seven pages was included in this number.

(B) Decrease.

(C) In 1867 and 1868 there was a very imperfect canvass made.

(D) In 1877-78 the freight yards and division headquarters of the N. Y. C. & H. R. R. were removed to Syracuse, which caused several thousand of the employees of the road and their families to change their residence to that city. Except for this, there would probably have been a slight increase in names in those years notwithstanding the extreme business depression of the time.

(E) Of this increase, 1,249 represented deaths and removals, which were this year given for the first time, leaving the net increase 692.

(F) Enlarged to octavo size, and printed in double columns for the first time.

For Cubic Measure the cube of long measure is used; **ster** is used as a measure of wood in place of cord.

The mill, cent, dime, dollar, and eagle of U. S. money exactly illustrate the decimal system of the metric measures,—the mill, cent, dime, corresponding with the milli, centi, deci of the metric system.

Abbreviations.—For meter, liter, and gram, the small initial letter is used, viz: m. l. g.; each division deci, centi, milli, also is abbreviated by using the small initial letters d. c. m.; but each multiple, deka, hekto, kilo, myria, is abbreviated by using the capital initial letter D. H. K. M.

Equivalents.—1 inch equals .0254 meter, or about 2 1-2 centimeters; 1 foot equals .3048 meter, or about 30 centimeters; 1 yard equals .9144 meter, or ab. 10-11 of a meter; 1 mile 1609 meters, or ab. 1.6 kilometers.

1 U. S. liquid quart equals .946 liter, or a little less than 1 liter; 1 U. S. dry quart equals 1.101 liters; 1 U. S. gallon equals 3.785 liters, or about 3.8 liters; 1 U. S. bushel equals 35.24 liters, or about 4-11 of a hektoliter.

1 avoirdupois ounce equals .02835 kilogram, or a little less than 30 grams; 1 Troy and apothecaries ounce equals .03110 kilogram, or a little more than 30 grams; 1 avoirdupois pound equals .45359 kilogram, or about 5-11 of a kilogram; 1 long ton—2240 pounds—equals 1016.05 kilograms, or about 1 metric ton.

Basis of the system.—1. The unit of length, the meter, is the ten millionth part of a quadrant of the meridian of Paris, being 39.37 inches, nearly. 2. The unit of surface, the ar, is the square of ten meters, or a hundred square meters. 3. The unit of capacity, the liter, is a cube whose edge is a tenth of a meter. 4. The unit of weight, the gram, is the weight of a cube of rain-water, whose edge is an hundredth of a meter. From these four primary units all others are derived according to the decimal scale.

Where used.—The system is adopted by the following countries: in exclusive use in France, Germany, Austria, Belgium, Holland, Italy, Spain, Portugal, Norway, Switzerland, Roumania, Brazil; in partial use in Denmark, Greece, Argentine Confederation, Venesuela; legalized, but not in general use, in the United States, Great Britian, Russia, Norway, Sweden, Turkey, Mexico, Chili, Costa Rica, Equador, Peru, U. S. of Columbia, Uruguay. In Sweden compulsory law will take effect in 1889.

STREET DIRECTORY.

The Street Directory gives the location of each street, and shows what other streets or places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of State street No. 435 comes: look at State street and you find that Brown street runs from 391 left side, and Jay street from 473, showing that No. 435 comes on the left side of State street between Brown and Jay. When streets are not numbered, dashes are used to indicate whether the street runs from the right, the left, or crosses.

Even numbers are invariably upon the north or east side of streets, and odd numbers upon the south or west side.

Streets on the east side of the river which run east and west are usually numbered from the west toward the east; those on the west side from the east toward the west.

Streets north of Main street which run north and south are usually numbered from the south toward the north; those south of Main street from the north toward the south. In Rochester, as in all cities, street numbers usually begin at the end of the street nearest the centre of the city.

THE CIVIL SERVICE.

For State Board of Commissioners, see Index of Contents.

By enactment of the legislature, all positions in the public service of Rochester (excepting those filled by public election, the heads of departments, and positions under the city treasurer or the Board of Education) must be filled from applicants who have successfully passed an examination by a board of civil service examiners.

The boards, consisting of three members, are appointed by the mayor, and not more than two members can be of the same political party.

Whenever a position is to be filled the examining board will notify the applicants on record, or such number of them as can be conveniently examined, to appear for examination, and appointments must be made by the appointing power from the three applicants who shall have the highest standing in such examination, persons who served in the army or navy in the late war having preference over others *if of equal standing*. Removals from office can be made without cause as heretofore. The civil service is classified as follows:

Schedule B, Part 1. Includes all officers and members of the Police and Fire Departments.

Schedule B, Part 2. Includes subordinate officers, clerks, and assistants not included in Part 1.

Laborers and day workmen are not subject to examination.

EXAMINING BOARDS.

Schedule B, Part 1. Francis A. Schoeffel, *Chairman;* Henry W. Mathews, Jonas P. Varnum.

Schedule B, Part 2. Lewis P. Ross, *Chairman;* Wm. F. Peck, David Hays, *Secretary*, George A. Benton

THOS. C. MONTGOMERY, *PATRICK BARRY.*

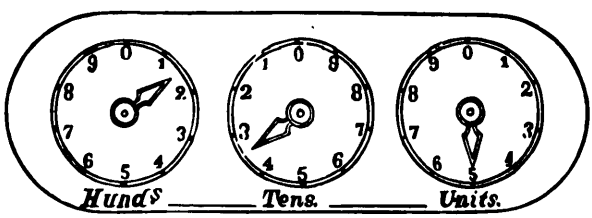

The Rochester Gas Light Co. supplies all the Coal Gas Used on the WEST side of the Genesee River.

PRICE, $2.10 per thousand feet; or, if paid before the 10th of the month, $2.00.

TO CONSUMERS.

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day, or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle Face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by ten for every additional face.

TO TELL THE STATE OF THE METER.—Look at the *left hand* face of the Index, and set down the figure of *least* value next the hand, which on the diagram is *1*. Next look at the *middle* face, and as before set down the figure of the *least* value next the hand, which on the diagram is *3*. Next upon the *right hand* face, take the same relative figure, which is *5*, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13,500 is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at *that* time from the *present* state, and you have the amount consumed in the interval.

☞ In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's office, No. 62 Mumford Street. At night ring the carriage bell on Mumford Street.

NEW LEDGER PATTERN,

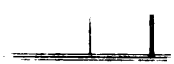

—— ON ——

BYRON WESTON'S LEDGER PAPER.

(Nothing Like it. Have Used it 20 Years.)

MONTH.	DAY.	ITEM.	PAGE.	DEBIT.	CREDIT.	PAGE.	MONTH.	DAY.	ITEM.
June	1	To Mdse,	305	6 8 4 20	1 0 9 0 26	489	June	29	By Cash.
	4	" "	357	1 0 4 06					
	5	" "	359	2 0 5 10					
	9	" "	367	6 9 48					
	26	" "	477	2 7 47					
				1 0 9 0 26	1 0 9 0 26				

POINTS OVER THE OLD WAY.

First—The figures are in the center of the page, and not in the roll of the book or outside edge.

Second—Debit and Credit are side by side, not considerable ways apart, as in old way.

Third—In balancing an account, two lines only are drawn, and there are no lines running diagonally across the page, and every account can be neatly closed as above.

Fourth—No person to my knowledge has returned to the old system who has once used this style. We have them in stock of Weston's paper, pages 10½x16, in all thicknesses, and all full pages or divided pages.

We endeavor to make first-class work, and shall always try to please all who may call on us.

First-class or no sale.

Yours,

JOHN C. MOORE,

No. 49 Smith's Arcade,

ROCHESTER, N. Y.

EXTRA DEBIT LEDGER,

On BYRON WESTON'S LEDGER PAPER (which always satisfies).

Arthur K. Staunton.

Aug.	3	10 lb. Sugar 75, 5 Raisins 75, 1 Tea 75,	8	2 25	Sept.	4	Cash	495	1 5 42
	8	1 Broom 30, 1 Coffee 37, 1 Ginger 20,	36	87					
	30	Bbl. Flour 7.00, 27 Ham 4.98, 2 Eggs 32,	360	1 2 30					

In a retail business, most of the Ledger entries are made up of several smaller charges, which are brought in to the Ledger as one item. By itemizing on the Ledger as above, all further reference to the Day Book is avoided and an account can be drawn off in a much shorter time. To accommodate these entries, the above ruling has been devised, and the credit, not needing much space, has been greatly shortened, thus giving several times more room on the debit side than on the credit side.

We have a very fine *stock* of Blank Books of our own make, and claim we can not be excelled in the manufacture of Blank Books. Have several thousand patterns, which we will gladly show anyone who will call on us. Yours,

JOHN C. MOORE,

CHEAPEST AND BEST SECURED LIFE INSURANCE.

NORTHWESTERN

Mutual Life Insurance Co.

1. **The Strongest of the Five Largest Mutual Companies**—as shown by ratio of surplus to liabilities.

2. **The Cheapest of all Companies,**—its dividends larger than in any other company, and at present *nearly double those of several of the most prominent ones.*

3. **The Safest of all Companies**—its location enabling it to make the safest investments, and at a far higher rate of interest than any of its competitors. The company realizing six per cent. interest can return, in the dividend, twice the surplus interest of the companies realizing but five per cent. *This advantage of location has enabled the Northwestern Mutual to pay all its death claims, taxes and expenses for the past ten years from its interest income*—no other company's interest doing this for one year.

J. A. KONDOLF. W. H. KONDOLF.

KONDOLF BROS.,

Wholesale and Retail Dealers in

Hemlock Lake Water Ice,

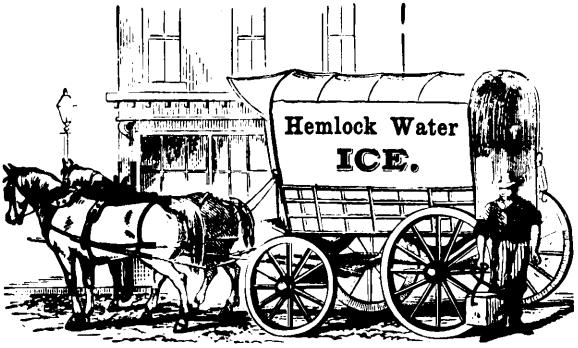

FROM KONDOLF LAKE, MONROE AVENUE.

TO THE PUBLIC.

The Kondolf Lake and Ice Houses were erected at a very large expense, for the purpose of procuring Pure Ice.

Everybody is aware that nearly all the ice sold in Rochester is from the Canal, Wide-waters, Quarries, Stagnant Ponds and River Waters.

This Lake is supplied with Hemlock Lake Water, by a pipe which is continually running, and there is in consequence a constant overflow at the outlet, on the opposite side of the Lake, which keeps it as pure as the water in the Reservoir at Mt. Hope. Therefore we ask your patronage, as the ice is sold and delivered as cheap as other ice.

Orders received at 170 Oak St., and at E. McSweeney's, 123 E. Main St., by Mail and Telephone.

Respectfully Yours,

Telephone No. 216. **KONDOLF BROS.**

UPPER RIVER ICE,

PUT UP BY

CHARLES HANSEN & CO.

Ice Houses: Genesee Street, near Sawyer, at the Rapids.

OFFICE, 255 EAST MAIN ST. Orders may be sent to either address.

This Ice is unequaled for PURITY, being taken from the Genesee River, above the City Limits. It is free from the usual objections of sewer drainage, factory waste, etc. We guarantee this to be a PURE WHITE ICE, and especially fit for drinking purposes.

Some of the points necessary to call attention to, are: First, a movable back and front, which throws off the spring in the leg. Second, it has an advantage in the use of the foot, hanging or unhanging, i. e., it can be used with a hanging foot, and it can be used the old way by putting the foot into the boot and then into the toe. Third, it is simple, durable; solid, and easy to work.

THE

JOHNSTON HARVESTER CO.,

OF BATAVIA, N. Y.

THIS COMPANY have for many years built and put upon the markets of the world their peculiar MACHINES FOR CUTTING GRASS and HARVESTING GRAIN, which have from the beginning taken the FIRST place among all those manufactured for that purpose. They have been tested by Scientific Machinists, by casual observers, and by Practical Farmers, and always with one and the same result, namely:

The First Award for Excellence of Workmanship and Quality of Work Done in the Field.

FARMERS IN WESTERN NEW YORK will find it greatly to their advantage to purchase SELF-BINDERS of the JOHNSTON HARVESTER COMPANY, in preference to those made at a distance. The Binders manufactured by this Company are made of the best material and in the best manner. This has given the preference to their Machines in all parts of the World. And while we can build a machine which will be as cheap as any in the market, we do not pretend to build a "cheap" machine merely to sell; but we believe the intelligence of Farmers in Western New York is sufficient to show them that first-class material and workmanship cannot be produced for the prices at which poor machines are hawked about. If they want a GOOD MACHINE for their work, we can supply them to much better advantage than any of our competitors; and we only ask those who need them to try our Machines before purchasing elsewhere.

Farmers desiring this Excellent Machine need to send their orders early for 1886, to insure their supply.

Our Binders use TWINE ONLY, and are Warranted to do First-Class Work.

Every pains taken to please our customers.

CONDUCTED BY

DRS. FREASE & STONE.

This Institution has such a choice variety and SUPERIOR QUALITY OF BATHS, MEDICAL AND SURGICAL APPLIANCES, as is believed places it in advance of all Sanitariums on this continent, *so far as their power of curing chronic diseases is concerned.*

LIST OF BATHS.—CONDENSED AIR (like those at Reichenhall, Germany, conducted by Dr. Von Liebig), ELECTRO-THERMAL, TURKISH, RUSSIAN, ROMAN, SULPHUR, SITZ, SUN, SEA SALT, ACID, ALKALINE, VAPOR, NEEDLE, and COMMON BATHS.

OTHER APPLIANCES.—Swedish Movements, Massage, Packs, Ozone, Oxygen, Inhalations, Inunctions, Electricity by means of a very fine Electrical Chair, and the various forms of Galvanism and Faradism.

Medical and Surgical Management.

DR. STONE is a graduate of the Medical Department of the University of New York City (Allopathic), and the Chicago Homœopathic College. He also took a special course in heart and lung diseases in Bellevue Hospital, under the instruction of Prof. Alfred L. Loomis, M. D., LL. D.; one in chemical analysis, under Prof. John C Draper, M. D., LL. D.; one in the use of the microscope, under Prof J. W. S. Arnold, M. D.: and one in Gynecology, under Prof. W. Danforth, M. D. He has had a wide experience, both in general and sanitarium practice.

DR. FREASE is a graduate of one of the leading Medical Colleges of Cincinnati. He has been remarkably successful in Sanitarium practice for over thirty years, and spent the winter of 1884-5 in New York City, among the colleges, hospitals, and dispensaries, investigating the results of the latest medical researches.

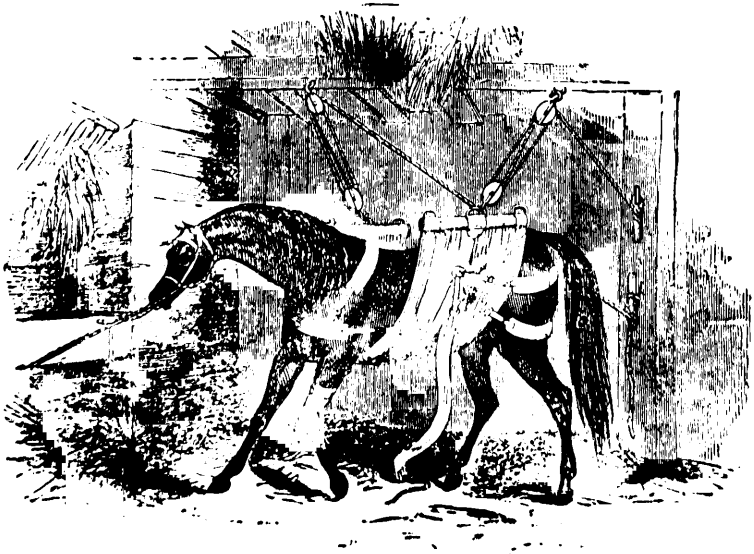

THE BUILDING is a fine modern brick structure, with every convenience and comfort, including an elevator and electric call-bells. *There is nothing of the "hospital" air or appearance.*

The Rochester Brewing Co.

Has been in existence but 8 years, and is provided with all the latest improvements known in the manufacture of

LAGER BEER.

The Company is now selling **over 75,000 bbls. per annum,** and as a matter of fact is the only Brewery which can show such progress in so short a time. The great and growing increase in its sales is the best evidence of the excellent quality and purity of its product. Recognizing its worth, Physicians, almost without exception, recommend its use to their patients, and as a consequence family trade has grown to immense proportions.

In connection with our Brewery, we have established a

BOTTLING DEPARTMENT,

And are ready to promptly fill orders for our

EXPORT, BOHEMIAN AND STANDARD LAGER BEERS.

Our uptown depot is at

MR. E. M. HIGGINS', NOS. 6 AND 8 STATE STREET,

And orders left with Mr. Higgins will receive the same prompt attention as if sent direct to the Bottling Works.

Our goods can also be had at the East Side Establishment of

Mr. Geo. J. Lutt, cor. Clinton and East Main Sts.

Knowing that the superior quality of our goods is our best advertisement, and assuring our customers of their getting only a pure, healthful and nutritious article, we hope for a liberal share of public patronage.

Very Respectfully,

ROCHESTER BREWING CO.

We are manufacturing a pipe that is indestructible from the action of all the elements, impervious to the action of acids, gases and steam, all of which are found in corporation sewers. These pipes are made from a combination of superior clays, which, by powerful machinery, are rendered uniform throughout—pressed from a steam press, under a pressure of *sixty-three tons* upon each pipe, it is made very compact; and burned in close kilns at a very intense heat, it becomes a thoroughly vitrified and iron like body. All prominent architects, builders, and all those who have investigated the subject of sewerage, have become convinced that properly burned clay pipe is the only material suitable for underground drainage, and that sewer and drain pipe manufactured from cement, carbonated stone, and other similar materials, are liable to and do *decay*, *disintegrate*, and become *worthless*, as has been many times proved by the officials in many cities.

These vitrified pipe are suitable for well tubing; are *better than stone or brick*, because cheaper, more durable, and can be made perfectly tight.

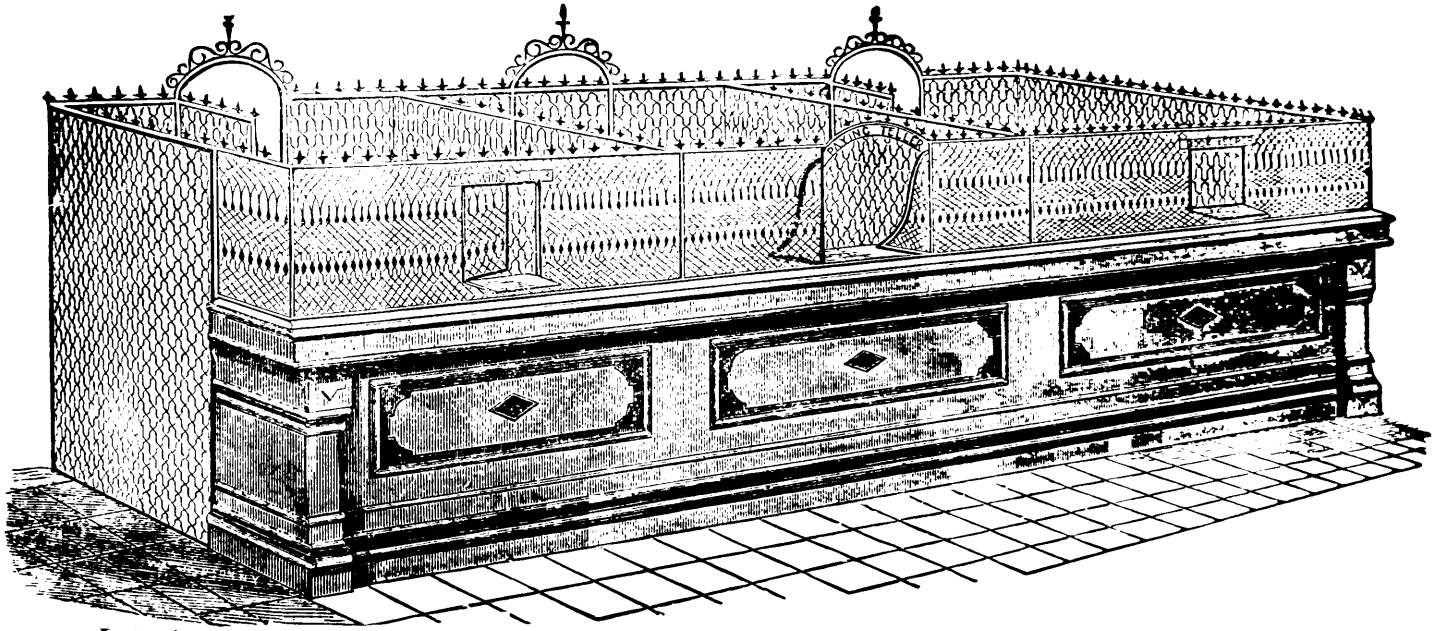

☞We deliver our pipe within the city limits Free of Charge, and in good condition.

These Celebrated Filters

Have been fully tested for many years throughout the United States, and their merits established as possessing every scientific and practical adaptation for family use rendering the most impure rain, river, or hydrant water, free from all organic matter, gases, taste or smell. The tubs are made of oak and bound with galvanized iron, and packed with specially prepared carbon, mixed with silex; with stoneware reservoirs inside which contain the filtered water, and from which can be drawn from two to four gallons at a time, and they filter from four to eight gallons per hour, according to size. On the top is fitted a zinc pan with sponge, where the principal impurities held in suspension are detained and can be washed out at pleasure. They are not liable to get out of order, and can be transported any distance with safety. They are portable, durable, convenient, and cheap. The filters and coolers are made with stoneware reservoirs coming to the top of the tub, into which ice may be placed. Manufactured by

The "Farmers' Favorite"

GRAIN DRILL.

TO FARMERS:

We ask attention to our **Speed Device,** for changing quantities of seed. This device carries all the gear needed in a case mounted on the axle, and leaves not a single wheel or piece to be lost or carried in tool box. All parts are protected from dirt and breakage. The wheels are both drivers, as on the improved mowers of the day. This device lightens, simplifies, and adds to the convenience of operation. Each change of quantity quickly and easily made, with the accuracy and positiveness of the multiplication table. If you examine it, we feel sure it will command your patronage.

FERTILIZER ATTACHMENTS.

"The Favorite" has been and remains to-day the STANDARD FERTILIZER attachment of America.

"The Wizard" is the most superb, convenient, and practical FORCE FEED FERTILIZER drill in the world.

"The Marks" we build with greater range of quantity, in better shape for work, with better convenience for operation, and upon a better grain drill, than any other party in the trade.

We put upon our drills this year a NEW GRASS SEEDER, built upon an old, tried, and universally approved principle, rendered doubly valuable and convenient by recent improvements in construction that are as practical as they are pronounced.

Our drills are fully warranted in every feature. Examine them closely, and you will purchase no other. With best wishes, your friends,

BICKFORD & HUFFMAN.
