House Directory supplement

EXPLANATORY NOTE.

In the House Directory residences and places of business, designated by their street numbers, are arranged in numerical order upon their respective streets, those upon the right side of a street appearing first, followed by those upon the left side. The streets are arranged in alphabetical order.

On streets that are not numbered ciphers have been substituted in place of a street number.

Names of all adult members of a family are stated against their proper street number, other members than the head of the family being designated by the letter b at the end of the line. When there are several families in one house, the families on the lower floor are given first with the boarders, if any, followed in regular order by the families upon the floors above, the respective floors being designated by the italic figures *1*, *2*, *3*, *4*, etc., and the basement by an italic *0*.

Business places are denoted by the street number printed in heavy faced figures.

When a person's place of business and residence are at the same place, it is indicated by the use both of heavy faced figures for the street number and of the abbreviation h. at the end of the line.

TO CONSUMERS.

The following explanations will enable any person to understand the Process of ascertaining the Registry of the Gas Meter, and by making observations every day, or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle Face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by ten for every additional face.

TO TELL THE STATE OF THE METER.—Look at the *left hand* face of the Index, and set down the figure of *least* value next the hand, which on the diagram is 1. Next look at the *middle* face and as before set down the figure of the *least* value next the hand, which on the diagram is 3. Next upon the *right hand* face, take the same relative figure, which is 5, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13,500 is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at *that* time from the *present* state, and you have the amount consumed in the interval.

☞ In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's office, No. 62 Mumford Street. At night ring the carriage bell on Mumford street.

PRICE, $1.60 per thousand feet; or, if paid before the 10th of the Month, $1.40.

Gas for Heating and Mechanical Purposes, $1 net per 1000 feet.

The Post Express.

"Hard times, hard times,
Come again no more."

THIS IS GOING TO BE A GREAT BUSINESS YEAR!

Take advantage of it by placing

YOUR ADVERTISING IN THE POST EXPRESS.

The day of uncertainty and doubt as to the outcome of the Rochester Post Express, is a thing of the past. It stands to-day among the papers of Western New York without a peer.

IT HAS MADE RAPID STRIDES,

And so firmly laid hold on the good-will of the people that nothing can shake it. It is the paper for everybody and the people all read it. To reach them you must use it.

WHY? **8 pages, 7 columns daily, printing Saturdays a double number (16 pages), brim full of choice reading. Few can resist it. 10 cts. a week.**

Besides, it is Rochester's recognized want medium, publishing

DOUBLE AS MANY WANTS

As all other Rochester papers combined — 7 columns of wants. The Legal paper, the Real Estate paper, and the great Society paper.

Our Job Department is par excellent, producing

EVERY VARIETY OF PRINTING.
