POWER of ADVERTISING

The ***City Directory*** is the power that generates information for the buyer that he may know who deals in the product he wishes to purchase. If your business is not classified properly, and a display advertisement arranged to describe your business, how can you expect the buyer to trade with you?

ADVERTISING is the foundation upon which successful businesses are built. You must apply this to your own particular business.

ADVERTISING is the power of an idea multiplied.

THE ROCHESTER DIRECTORY

For the year ending October 1,

1925

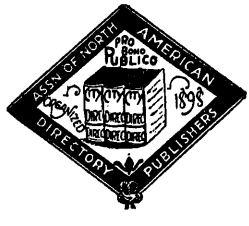
Containing

Alphabetical Section (Page 161) Gives names, occupations and addresses of all men twenty years old or over, women who carry on business, widows, and all business houses. Dates of deaths during the previous year are given, and where possible, the addresses of people who have moved to other cities. The names of partners in firms are given in this department, with much other information that cannot be found elsewhere.

Business Directory (Page 1601) All business houses, individuals in business for themselves, and professional men are listed without charge under the heading that best describes them. The more progressive houses, realizing that it pays to be easily found, pay a nominal charge for special listings in heavy type, under every heading where a buyer might look for them, cross-indexed to a descriptive space in the "reference section."

Reference Department (Page 1905) Where more information than is possible to give under the headings is placed on file for buyer's reference. The value of this department cannot be estimated. It is an index of the best business interests of the city, and stands for them and the city in reference libraries all over the country, as well as on the desks of progressive business men. It is accessible to everybody, and the logical place to look for specific information. This probably explains why no other form of publicity is so generally endorsed by business men, as a glance at this department will show.

House Directory (Page 1201) All business houses, individuals in business, and householders, listed in numerical order upon their respective streets; those upon the right side appearing first, followed by those upon the left. The streets are arranged in alphabetical order, as in the street directory, with descriptions. A feature of great value and convenience.



Map (inside back cover) The clearest map ever made of the city, on a scale large enough to see, and small enough to be handled easily.

Street Directory (Page 113) A complete list of Streets, giving numbers at intersections, and enabling one to tell at once between what streets a given number lies, and the quickest way to get there.

An alphabetical list of Halls, Blocks and Buildings from which street and number may be found for addresses which only give name of a certain building.

Miscellaneous Information (Page 12) Organization of City Departments, giving officers and salaries,—Cemeteries,—Railway stations,—Churches and ministers,—Societies, Institutions, etc., with officers,—State officers and departments,—U. S. officers and departments,—Courts holding sessions in the city, with terms, officers and salaries,—Population tables, etc.

WATER RATES.

$1.35 per 1,000 cu. ft. for each service taking less than 20,000 cu. ft. per month. For each service taking more than 20,000 cu. ft. per month, $1.35 per 1,000 cu. ft. for the first 20,000 cu. ft. per month, $1.20 per 1,000 cu. ft. for the next 80,000 cu. ft. per month, and $1.05 per 1,000 cu. ft. for all in excess of 100,000 cu. ft. per month.

THE CIVIL SERVICE.

For State Board of Commissioners, see page 61.

By enactment of the legislature, all positions in the public service of Rochester (excepting those filled by public election, the heads of departments and confidential subordinates), must be filled from applicants who have successfully passed an examination by a Board of civil service examiners, or from registered list of laborers.

A Board consisting of three members is appointed by the mayor, who also appoints the secretary and chief examiner.

Whenever a position is to be filled, the examining Board will notify the applicants on record, to appear for examination, and appointments must be made by the appointing power from the list prepared by the commission.

Soldiers or sailors who served in the war of the rebellion, having any standing on the list, have the preference. Soldiers and sailors of Spanish-American war have no preference in appointment.

Local Board of Municipal Examiners. *(For City Appointments).*

ROCHESTER

Many special advantages are offered by Rochester to the home-seeker and to the business man. It is a city with picturesque surroundings, set in the heart of the fertile Genesee Valley at the point where the river takes a drop of more than 300 feet in a series of three falls, and thus presents an ideal combination of industry and agriculture. The city occupies a strategic position from the standpoint of transportation, so that raw materials are easily and cheaply obtained and finished products promptly distributed. The city owes its location to the power generated in the Genesee River The development of this power, originally used to cut logs and grind corn, has made Rochester an industrial city of note whose products are known in all parts of the world.

In its growth the city has lost few of its original charms and has taken on all the advantages of a large city. Rochester is located in the largest agricultural county in New York State, a county which ranks well up in point of productiveness with any in the country. Monroe County, with its five surrounding counties total a population of about 500,000, and a circle drawn with a radius of 90 miles from Rochester embraces a population of nearly two million.

Known first as the Flour City because of its extensive milling interests, the city's cognomen was later changed to the Flower City because of the extensive horticultural interests which were developed. With the growth of industry on a large scale, the city became known as the city of varied industries and took as its slogan "Rochester Made Means Quality." Rochester boasts many famous industrial organizations and leads the world in the production of a number of products.

In Rochester are the largest manufacturers of enameled steel tanks in the world; the largest manufacturers of filing devices and office systems; the largest thermometer plant in the world; the largest optical works in the world; the largest manufacturers of check protectors; the largest film factory in the world; the largest camera factory in the world; the largest photographic plate factory in the world; the largest manufacturers of soda fountain fruits and syrups. It is a leader in telephone apparatus, paper box manufacture and many other lines. More high-class ivory buttons are made here than in any city in the United States. It is the headquarters of the nursery business of the United States.

The city boasts 1700 manufacturing establishments producing over 325 separate commodities. The investment in manufactures is $200,000,000 and the annual wages paid approximate $110,000,000. Rochester is the world's headquarters for photographic goods and supplies. It ranks fourth in the production of women's shoes and has the same rank in the production of men's clothing. The production of shoes each year is valued at $40,000,000 and the clothing output is valued at $80,000,000.

The city covers 21,009.5 acres. Its assessed valuation is $456,407,234. The death rate in 1923 was 11.06 per thousand population. The birth rate in 1923 was 20.67 per thousand population. The tax levy in 1924 was $11,458,660.42, giving a rate of $25.12 per thousand.

One of the outstanding features of the city is its park system which includes five large and twenty-six small parks containing 1,649 acres.

Central Library of Rochester and Monroe County · City Directory Collection · 1924

Genesee Valley Park contains 589.83 acres; Durand-Eastman Park along the Lake Ontario Shore contains 474 acres; Edgerton (Exposition) Park has an area of 42 acres, contains eight large practical and beautiful buildings.

Because of the high grade of workmanship demanded in most of Rochester's industrial organizations, Rochester boasts an unusually large percentage of skilled mechanics. This means that wages are good, a situation which is reflected in the large proportion of home-owners found in this city. More than 42% of Rochester's dwellings are owned by those who live in them, which puts Rochester among the first ten cities of the country in this respect.

From a transportation point of view the city enjoys many advantages. Many of the articles manufactured in Rochester are of a specialty and technical nature. The out-bound freight business from Rochester, therefore, is largely made up of less than carload shipments. As a result of this immense tonnage, the city undoubtedly has the best distributive service of any city this side of the sea board. Rochester is served by five steam roads and as many interurban trolleys. It is also located on the New York State Barge Canal and has an excellent harbor at the mouth of the Genesee where a great tonnage of in-bound and out-bound freight is handled, as well as a great volume of passenger traffic.

The city has recently established a Municipal Dock in the harbor and is taking other steps for the development of this natural resource. With the exception of the firms located on one single track line, all industries of Rochester are located in what is known as the Rochester switching district. Cars in-bound by any route, with the one exception named, can be spotted on the sidings of industries within the switching territory free of any additional expense. In other words, cars are spotted in the industries or forwarded therefrom on the basis of no greater cost than the flat Rochester rate. In the harvesting season hundreds of carloads of peaches, pears, grapes, apples and other fruits are shipped out of Rochester and surrounding territory.

Rochester is but an over-night's ride from New York, Washington, St. Louis, Cincinnati, Cleveland, Detroit, Toronto, Boston, Montreal and Chicago. This gives fast service in obtaining coal and other raw materials and in the distribution of finished products. One of the latest improvements in the city's transportation facilities is the new belt line railroad through the heart of the city in the bed of the old Erie Canal. This connects up all the railroads serving Rochester, both steam and electric, and provides rapid transit service for residents of the city as well as a fast freight movement.

The Barge Canal harbor, three miles long, extending from the heart of the city to the crossing of the Barge Canal on the South, has just been completed, together with extensive terminal facilities.

National advertising of many of the large industrial organizations has helped to keep Rochester and its products before the world. Goods from Rochester factories are found on the counters of merchants in all the states of the union and in many foreign countries.

About 40,000 horse power of electricity is developed from the Genesee River and plans have been made for the development of many times this amount by the damning of the Genesee at Portage.

Rochester enjoys excellent educational opportunities, especially of a technical and artistic nature, including schools of music, of art, and of medicine. The latter is just being organized along plans which will make it one of the leading institutions of its kind in the country, under the administration of the University of Rochester.

ROCHESTER STREET DIRECTORY

Copyright 1924 by Sampson & Murdock Company, Inc., Rochester, N. Y.

The Street Directory gives the location of each street, and shows what other streets or places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of State street No. 501 comes: look at State street and you find that Jay street runs from 473 left side, and Smith street from 559, showing that No. 501 comes on the left side of State street between Jay and Smith streets.

Or, going up Main street West, suppose it is wished to take a cross street so as to call at 314 Troup street: on examination (see Troup), you find that 306 Troup is at the corner of Reynolds street; hence, by passing from Main street West through Reynolds street to Troup, you are near the desired number 314. When streets are not numbered, dashes are used to indicate whether the street runs from the right, the left, or crosses.

Street numbers begin at the end of the street nearest the centre of the city. **Even numbers** are upon the north or east side of streets. **Odd numbers** are upon the south or west side of streets.

●Indicates street car lines. When placed after the name of a street it shows that the car line runs through that street. When placed after a street beginning, ending or intersecting, it denotes cars on such intersecting street. For example, the ● connected with Adams street shows cars on Exchange street and Caledonia avenue but not on Adams street or Jefferson avenue. At Allen street cars run through the street also on connecting streets, State and Plymouth avenue North.

Total area of the city is about 21,000 acres.

Number of streets and alleys in city, 1,634. Total length of streets, about 425 miles.

REMOVALS.—*Against names showing removals from the city, the post office address is given; if into another State, both the post office and State are given.*

DEATHS.—*The date of death of citizens whose names appeared in the Directory dying during the past twelve months, are recorded against the name in the present book. The same has been done each year since 1876, so that the several volumes of the Directory contain a mortuary list for that period, of great reference value.*
