WATER RATES.

\$1.35 per 1,000 cu. ft. for each service taking less than 20,000 cu. ft. per month. For each service taking more than 20,000 cu. ft. per month, \$1.35 per 1,000 cu. ft. for the first 20,000 cu. ft. per month, \$1.20 per 1,000 cu. ft. for the next 80,000 cu. ft. per month, and \$1.05 per 1,000 cu. ft. for all in excess of 100,000 cu. ft. per month.

When more than one water service enters one and the same piece of property and the consumption of water thereon exceeds 100,000 cu. ft. per month, and all such water is used for one and the same business or commercial purpose, then the charge for water may be based upon the combined usage from all the services instead of each service separately.

The minimum charge for water under these rates shall be \$1.50 per quarter of three months.

A charge of \$10.00 per quarter of three months shall be made for each city owned Fire Service meter which is or may be installed on any premises.

Metered Water bills—Payable quarterly. \$1.35 per 1,000 cubic feet. Minimum \$6.00 per year.

All employees of this Bureau are appointed by the Superintendent of Water Works. The original Water Works were begun in July, 1873, and completed in February, 1876. They embrace two distinct systems of water distribution from two separate sources. The first or principal one is the gravity system from Hemlock Lake as source, which now includes three conduits and 443 miles of distributing pipe; the second is the Holly System, which derives its supply from the Genesee River and serves essentially in affording a more efficient fire protection in the central and manufacturing districts of the city, the extent of distributing pipe connected therewith being about 25 miles. Total length of distributing pipes, in city, of both systems, about 468 miles.

Conduit I consists of 9.8 miles of 36-inch, and 3 miles of 24-inch wrought-iron riveted pipe, and 15.5 miles of 24-inch cast-iron pipe; total length of conduit I is 28.3 miles.

Conduit II consists of 2,252 miles of brick conduit 6 feet in diameter, 29 of 60-inch steel intake pipe and 25.94 miles of 38-inch riveted steel pipe, with 2 miles of 36-inch cast-iron pipe; total length of conduit II, 30.4 miles.

Conduit III was constructed in 1914 to 1918 from the foot of the brick tunnel to Rochester and consists of 7.8 miles of 37-inch cast-iron pipe and 17.7 miles of 37-inch lock-bar steel pipe. Total length of conduits and distributing pipes, January 1, 1919, 542.2 miles.

Miles from City Hall to Mt. Hope Reservoir, 1.6; to Rush Reservoir, 10.4; to Hemlock Lake, 29.7.

Elevation of Mt. Hope Reservoir above canal aqueduct, 125.48 feet; capacity of Mt. Hope Reservoir, 24 million gallons at a depth of 16 feet; water surface area, 5½ acres.

Elevation of Rush Reservoir above canal aqueduct, 242.85 feet; capacity of Rush Reservoir, 74 million gallons at a depth of 19 feet; water surface area, 14 acres.

Elevation of Cobb's Hill Reservoir above canal aqueduct, 125.48 feet; capacity about 144 million gallons at a depth of 25 feet. Water surface area, about 18 acres.

Elevation of Hemlock Lake above canal aqueduct, 385 feet; water surface area, 1,828 acres; drainage area, 48 square miles; length of lake, 7 miles; average width of lake, ¾ of a mile; depth of lake, 86 feet.

Elevation of Canadice Lake above canal aqueduct, 586 feet; length of lake, 3½ miles; average width of lake, one-third of a mile; depth of lake, 86 feet.

Number of fire hydrants set in city January 1, 1923, about 6,252, number of stop valves, 10,339; number of drinking fountains for animals, 80; capacity of conduit I per day, 7,000,000 gallons; capacity of conduit II, 16,000,000 gallons; capacity of conduit III, 19,000,000 gallons; Holly pumping works, 13,000,000 gallons. Daily average consumption, both systems, 26,700,000 gallons.

Original cost of introduction of the water, for which thirty-year 7 per cent. bonds were issued, \$3,518,000; additional cost for extending mains within the city limits, including large new distributing mains and new storage reservoir, being the amount included in tax levies and bond issues, from 1876 to January 1, 1918, \$5,855,586.59. Cost of conduit II and new distributing mains, approximately, \$3,000,000. Cost of conduit III, \$1,422,243.01.

Number of taps January 1, 1877, 3,260; June 1, 1880, 7,395; June 1, 1885, 15,659; April 1, 1890, 23,068; April 1, 1895, 27,921; January 1, 1900, 33,977; January 1, 1905, 37,680; January 1, 1910, 45,729; January 1, 1915, 56,311; January 1, 1916, 58,092; January 1, 1917, 60,704; January 1, 1918, 61,633; January 1, 1919, 61,836; January 1, 1920, 62,185; January 1, 1921, 62,431; January 1, 1922, 62,889; January 1, 1923, 70,437; January 1, 1924, 71,186.

Revenue from Water Rents and all other sources, January 1 to December 31, 1923, \$1,286,391.30. Operating expenses January 1 to December 31, 1923, \$572,991.16. Amount contributed to the city treasurer to be applied to payment of interest on funded water debt and sinking funds in 1923, \$547,559.45.

THE CIVIL SERVICE.

For State Board of Commissioners, see page 61.

By enactment of the legislature, all positions in the public service of Rochester (excepting those filled by public election, the heads of departments and confidential subordinates), must be filled from applicants who have successfully passed an examination by a Board of civil service examiners, or from registered list of laborers.

A Board consisting of three members is appointed by the mayor, who also appoints the secretary and chief examiner.

Whenever a position is to be filled, the examining Board will notify the applicants on record, to appear for examination, and appointments must be made by the appointing power from the list prepared by the commission.

Soldiers or sailors who served in the war of the rebellion, having any standing on the list, have the preference. Soldiers and sailors of Spanish-American war have no preference in appointment.

Local Board of Municipal Examiners. (For City Appointments).

Chairman, Adolph M. Spielher; **Samuel C. Pierce** and **William H. Gragen**, salaries \$1,000 each. **Secretary and Chief Examiner**, Louis E. Lazarus; salary, \$1,650. **Chief Clerk**, Margaret A. Lucy; salary, \$1,650. Office, 40 City Hall Annex.

ROCHESTER

Many special advantages are offered by Rochester to the home-seeker and to the business man. It is a city with picturesque surroundings, set in the heart of the fertile Genesee Valley at the point where the river takes a drop of more than 300 feet in a series of three falls, and thus presents an ideal combination of industry and agriculture. The city occupies a strategic position from the standpoint of transportation, so that raw materials are easily and cheaply obtained and finished products promptly distributed. The city owes its location to the power generated in the Genesee River. The development of this power, originally used to cut logs and grind corn, has made Rochester an industrial city of note whose products are known in all parts of the world.

In its growth the city has lost few of its original charms and has taken on all the advantages of a large city. Rochester is located in the largest agricultural county in New York State, a county which ranks well up in point of productiveness with any in the country. Monroe County, with its five surrounding counties total a population of about 500,000, and a circle drawn with a radius of 90 miles from Rochester embraces a population of nearly two million.

Known first as the Flour City because of its extensive milling interests, the city's cognomen was later changed to the Flower City because of the extensive horticultural interests which were developed. With the growth of industry on a large scale, the city became known as the city of varied industries and took as its slogan "Rochester Made Means Quality." Rochester boasts many famous industrial organizations and leads the world in the production of a number of products.

In Rochester are the largest manufacturers of enameled steel tanks in the world; the largest manufacturers of filing devices and office systems; the largest thermometer plant in the world; the largest optical works in the world; the largest manufacturers of check protectors; the largest film factory in the world; the largest camera factory in the world; the largest photographic plate factory in the world; the largest manufacturers of soda fountain fruits and syrups. It is a leader in telephone apparatus, paper box manufacture and many other lines. More high-class ivory buttons are made here than in any city in the United States. It is the headquarters of the nursery business of the United States.

The city boasts 1700 manufacturing establishments producing over 325 separate commodities. The investment in manufactures is \$200,000,000 and the annual wages paid approximate \$110,000,000. Rochester is the world's headquarters for photographic goods and supplies. It ranks fourth in the production of women's shoes and has the same rank in the production of men's clothing. The production of shoes each year is valued at \$40,000,000 and the clothing output is valued at \$80,000,000.

The city covers 21,009.5 acres. Its assessed valuation is \$456,407,234. The death rate in 1923 was 11.06 per thousand population. The birth rate in 1923 was 20.67 per thousand population. The tax levy in 1924 was \$11,458,660.42, giving a rate of \$25.12 per thousand.

One of the outstanding features of the city is its park system which includes five large and twenty-six small parks containing 1,649 acres.

Genesee Valley Park contains 589.83 acres; Durand-Eastman Park along the Lake Ontario Shore contains 474 acres; Edgerton (Exposition) Park has an area of 42 acres, contains eight large practical and beautiful buildings.

Because of the high grade of workmanship demanded in most of Rochester's industrial organizations, Rochester boasts an unusually large percentage of skilled mechanics. This means that wages are good, a situation which is reflected in the large proportion of homeowners found in this city. More than 42% of Rochester's dwellings are owned by those who live in them, which puts Rochester among the first ten cities of the country in this respect.

From a transportation point of view the city enjoys many advantages. Many of the articles manufactured in Rochester are of a specialty and technical nature. The out-bound freight business from Rochester, therefore, is largely made up of less than carload shipments. As a result of this immense tonnage, the city undoubtedly has the best distributive service of any city this side of the sea board. Rochester is served by five steam roads and as many interurban trolleys. It is also located on the New York State Barge Canal and has an excellent harbor at the mouth of the Genesee where a great tonnage of in-bound and out-bound freight is handled, as well as a great volume of passenger traffic.

The city has recently established a Municipal Dock in the harbor and is taking other steps for the development of this natural resource. With the exception of the firms located on one single track line, all industries of Rochester are located in what is known as the Rochester switching district. Cars in-bound by any route, with the one exception named, can be spotted on the sidings of industries within the switching territory free of any additional expense. In other words, cars are spotted in the industries or forwarded therefrom on the basis of no greater cost than the flat Rochester rate. In the harvesting season hundreds of carloads of peaches, pears, grapes, apples and other fruits are shipped out of Rochester and surrounding territory.

Rochester is but an over-night's ride from New York, Washington, St. Louis, Cincinnati, Cleveland, Detroit, Toronto, Boston, Montreal and Chicago. This gives fast service in obtaining coal and other raw materials and in the distribution of finished products. One of the latest improvements in the city's transportation facilities is the new belt line railroad through the heart of the city in the bed of the old Erie Canal. This connects up all the railroads serving Rochester, both steam and electric, and provides rapid transit service for residents of the city as well as a fast freight movement.

The Barge Canal harbor, three miles long, extending from the heart of the city to the crossing of the Barge Canal on the South, has just been completed, together with extensive terminal facilities.

National advertising of many of the large industrial organizations has helped to keep Rochester and its products before the world. Goods from Rochester factories are found on the counters of merchants in all the states of the union and in many foreign countries.

About 40,000 horse power of electricity is developed from the Genesee River and plans have been made for the development of many times this amount by the damming of the Genesee at Portage.

Rochester enjoys excellent educational opportunities, especially of a technical and artistic nature, including schools of music, of art, and of medicine. The latter is just being organized along plans which will make it one of the leading institutions of its kind in the country, under the administration of the University of Rochester.
