There are two kinds of Advertising

That which the Buyer seeks, and that which is thrust upon him.

Both are good

Display advertising *suggests* wants and *creates* desire. Of its tremendous power many present day successes bear witness.

Reference Advertising steps in when the desire has been created. It shows where the goods can be purchased and gives information that the buyer wants *when he wants to buy.*

A Connecting Link

The weakness of display advertising is that often a need is not realized until the ad that suggested it is misplaced or thrown away.

A shrewd buyer usually looks the field over before buying and where is so logical a place to look as *in this book.*

A Help to You

In your buying, use the lists in this book. If you see a name in *heavy type* it is because that concern thought enough of your possible business to make it easy for you to find them. If it says "See page — —" you will find there information that will really help you.

Are You Covered

Have you made it easy for buyers to find you, by putting a bold type listing under every heading where they might look for you or a competitor? Have you put information in the "Selling Section" that will really help a buyer, and point to *you* as the one who can serve him best?

If not, make a note to do it in the next edition, and let us tell you *now* how little it costs to be *protected.*

ROCHESTER HOUSE AND STREET DIRECTORY

COPYRIGHT, 1927, SAMPSON & MURDOCK CO., INC., ROCHESTER, N. Y.

Names of householders and business places arranged in numerical order upon their respective streets. The streets are arranged in alphabetical order. On streets that are not numbered ciphers are used in place of a street number. Intersecting streets are shown in italics

Business places are denoted by business being given. In business blocks the occupants are arranged by room number where practicable.

When business and residence are at the same place, it is indicated by business being given followed by abbreviation h.

Street numbers are in ordinary type, room and floor number in italic.

Street numbers begin at the end of the street nearest the centre of the city. Even numbers are upon the north or east side of streets. Odd numbers are upon the south or west side of streets.

After each street the car line running through or nearest to it is named in italics.

*Denotes streets improperly numbered.
