AGRICULTURAL STOCK.

SHEEP FARMING.

True important subject should now engage the attention of the farmer, more especially at the present season when the economic depression that now prevails in the country is the daily affair of the agricultural world. We have been favored with a visit from Mr. H. E. Dean, of Cortland, N. Y., who has been engaged in sheep farming for many years, and who is one of the leading men in the State in that line of business. Mr. Dean is a gentleman of great energy and enterprise, and his farm is a model of everything that can be done in the way of sheep culture. It is situated on a level piece of land, about five miles from the village of Jortland, and is one of the most interesting places of its kind in the country.

The property of Mr. Dean is very valuable, being situated on a good soil, and having a fine water supply. The pasture is very good, and the climate is admirably adapted to the culture of sheep. The farm is well stocked, and the animals are in fine condition. The sheep are all very healthy, and the wool is of a fine quality. The farm is well managed, and the results are very satisfactory. The farm is about 120 acres in extent, and is well laid out and managed. The buildings are in good condition, and the implements are of the best kind.

The animals of Mr. Dean are all of the best breeds, and the wool is of a fine quality. The sheep are all of the Lincoln breed, and the wool is of a fine quality. The farm is well stocked, and the animals are in fine condition. The sheep are all very healthy, and the wool is of a fine quality. The farm is well managed, and the results are very satisfactory. The farm is about 120 acres in extent, and is well laid out and managed. The buildings are in good condition, and the implements are of the best kind.

April 1st, it would astonish some of our friends to see the country thus shorn. A farmer approaches his property, and finds that all his sheep and goats are stripped of their wool.

We write from country, and find a large number of stock have been sheared. We have seen a large number of sheared sheep and goats in the vicinity, and find that there are a great many farmers who have been sheared within the past month or two.

The weather has been very favorable for shearing, and the farmers have made good progress. The wool is of good quality, and the farmers are pleased with the results.

The wool has been sold at very high prices, and the farmers are looking forward to a good year.

The shearing season is now in full swing, and we expect to see a large number of sheared sheep and goats in the vicinity in the near future.

April 1st, 1861.
Horticultural

GARDEN WORK IN NOVEMBER.

November work of importance should be done in all gardens. A turn in the weather is a period of transition, the leaves falling from the trees and all the

vegetable garden should be put in order for winter. The bare ground should be

loosened and the weeds removed. A light dressing of manure or compost should be spread over the soil and plowed or scrunched into the

ground. The beds should be broken up and harrowed, and the

fertilizer should be distributed, and removed from the

shallow-rooted plants as a general thing, as to keep them in a

proper condition. This really excellent stew would be fur-

nished to the dough with a little of the

bread, so much the better; your stew

will be richer, and more delicious for the addi-

tion. This really excellent stew would be fur-

tion.
THE RUFLS OF THE WIND.

BY JOHN H. COLBY.

The wind is a presence in the world, a spirit that moves the air, a force that shapes the landscape, a melody that fills the ears. It is a phenomenon that has captured the imagination of poets and writers for centuries, and its influence is felt in every corner of the globe.

One of the earliest recorded descriptions of the wind can be found in the Bible, where it is referred to as "the breath of the Lord." In the Book of Job, God speaks of the wind as a symbol of His power and majesty: "The wind comes from the edge of the earth, and the breath of the Almighty comes with the warmest of winds..."

In the 19th century, the wind became a symbol of freedom and progress, as seen in the work of Ralph Waldo Emerson. He wrote: "The wind is a great liberator. It breaks the bonds of our stagnant life, and sweeps away our corpse and dust. It is the great spirit of crispness and vigor, blowing upon the winter..."

More recently, the wind has been celebrated in literature as a symbol of change and transformation. In Thomas Hardy's novel "The Mayor of Casterbridge," the wind is a motif that foreshadows the characters' fortunes and fates. And in Ernest Hemingway's "The Old Man and the Sea," the wind is a symbol of struggle and resilience.

Today, the wind continues to be a source of inspiration and wonder, as we seek to understand its role in our planet's climate and weather. Whether we are Artists, writers, or scientists, we are all moved by the wind's power and beauty.

So let us honor the wind, and all that it represents, in our own work and lives. May it be a source of inspiration, a guide for our paths, and a reminder of the beauty and mystery that surrounds us.

END OF ARTICLE.

**Varieties of Tobacco.**

**A MARMALADE Machine.**

The teacher was so partial to marmalade that he refused to give a piece of it to any child who did not eat his dinner. When the children were asked why they did not eat their dinner, they replied, "We don't like marmalade." The teacher then said, "If you don't like marmalade, you can have apple sauce." The children then asked, "Why can't we have apple sauce?" The teacher replied, "Because apple sauce is not as good as marmalade." The children then asked, "Why can't we have both?" The teacher replied, "Because you can't have both at the same time."

**The Origin of Petroleum.**

The origin of petroleum is a mystery that has puzzled scientists for centuries. Some believe that it is formed from the remains of marine organisms that lived millions of years ago, while others believe that it is created from the decay of organic matter in sediments. Still others believe that it is formed from the interaction of certain geological processes. Despite the many theories, the exact origin of petroleum remains a mystery.

**The Secret.**

The secret to happiness is to be happy. This may sound simple, but it is not always easy to achieve. Happiness is a complex emotion that is influenced by many factors, including our genetics, our environment, and our experiences. However, there are some things we can do to help increase our happiness, such as practicing gratitude, focusing on the positive, and taking care of our physical and emotional well-being. By cultivating these habits, we can increase our happiness and enjoy a more fulfilling life.

**Corner for the Young.**

- **Arabian Nights.**
  - The story of Aladdin and his lamp is a classic tale from the Arabian Nights. It tells the story of a poor boy named Aladdin who finds a magic lamp that grant him wishes. However, he must be careful not to lose the lamp, as it is guarded by a powerful genie who will do anything to keep it. The story teaches the importance of wisdom, courage, and self-control.

- **American History.**
  - The American Revolution was a war for independence fought between 1775 and 1783. It began when the American colonies rebelled against British rule and ended with the signing of the Treaty of Paris in 1783. The war was fought on land, sea, and in the air, and resulted in the creation of the United States of America. The war was marked by many famous battles, including Bunker Hill, Trenton, and Yorktown, and it is remembered as a time of great sacrifice and heroism.

- **Mathematical Problem.**
  - The problem of finding the value of a certain polynomial is a classic example of a mathematical problem. The polynomial in question is given by

  \[ P(x) = x^3 + 2x^2 + 3x + 4 \]

  The problem is to find the value of this polynomial at a given point, say \( x = 5 \). To solve this problem, we simply substitute the value of \( x \) into the polynomial and evaluate it. In this case, we have

  \[ P(5) = 5^3 + 2(5)^2 + 3(5) + 4 = 125 + 50 + 15 + 4 = 214 \]

  Thus, the value of the polynomial at \( x = 5 \) is 214.

- **Arithmetic Problem.**
  - To solve an arithmetic problem, we need to use our knowledge of arithmetic operations, such as addition, subtraction, multiplication, and division. For example, if we are given the problem

  \[ 7 + 3 \times 2 - 4 \]

  We need to perform the operations in the correct order, following the rules of arithmetic. In this case, we have

  \[ 7 + 3 \times 2 - 4 = 7 + 6 - 4 = 13 - 4 = 9 \]

  Thus, the solution to the problem is 9.

**Reading for the Young.**

**A Natural Flying Machine.**

The accompanying note and description of a proposed novel Flying Machine, by a Baltimore correspondent, have attracted the attention of all interested in the world of sports. The machine is said to be made of one piece, with a wingspan of seven feet, and to be capable of carrying a man. It is of a very light construction, and is therefore expected to be a great improvement on the present methods of travel. The machine is to be demonstrated in the presence of the New York Mechanics' Institute, and it is hoped that it will attract a large audience.

- **Mythology.**
  - The story of Pandora's Box is a classic tale from Greek mythology. It tells the story of a beautiful woman named Pandora who is given a box by the gods as a gift. However, she is warned not to open the box, as it contains a terrible curse. When she finally opens the box, all sorts of evils and disasters are released, including death, disease, and war. The story teaches the importance of caution and the consequences of curiosity.

- **Greek Mythology.**
  - The story of Theseus and the Minotaur is a classic tale from Greek mythology. It tells the story of a brave young man named Theseus who is sent to kill the Minotaur, a fearsome monster that lives in a labyrinth. The story is a test of courage and perseverance, and it is remembered as a time of great adventure and heroism.

- **Arithmetic Problem.**
  - To solve an arithmetic problem, we need to use our knowledge of arithmetic operations, such as addition, subtraction, multiplication, and division. For example, if we are given the problem

  \[ 7 + 3 \times 2 - 4 \]

  We need to perform the operations in the correct order, following the rules of arithmetic. In this case, we have

  \[ 7 + 3 \times 2 - 4 = 7 + 6 - 4 = 13 - 4 = 9 \]

  Thus, the solution to the problem is 9.
**Arms at Washington.** Several dispatches from large activities sent the Secretary of War. The President has addressed Chief of Staff, and there was a considerable increase in the orders given for arms. The Secretary of War has instructed the various arsenals to prepare for the immediate production of large quantities of ammunition.

**Commissary Department.** The Commissary Department has been placed under the command of Col. H. F. Clark, Commissary to Albert Sidney Johnston. The Commissary Department has been instructed to provide for the immediate needs of the army.

**Circulation.** The Washington Monumental Association have commissioned Dr. McGowan to solicit contributions towards the monument as soon as possible.

For Supplying Dwellings, Store
to Him;" and in a deep and solemn voice he be-
said the old preacher, "let .us raise our hearts
by little they grew pale and appeared to drop
parishioners; he was denounced and arrested as
aristocrat, for they called it a crime then to
tribunal. "While he was thus engaged, on this
the jailor happened to come in, and cried out:
place as the prison where they had
burning, and the road dusty.
JAQUES BERANOER, the good preacher, was one
before them! Every one in the crowd found
unfortunates who believed themselves devoted
the six a matron of the town, and a few days afterward a
charge that a small amount of furniture would be
carried out, the two girls and the old man
in a wagon, and the trial was conducted
as usual; he was defended and cast out.

The preacher stopped; with a hundred livres
he would have bought the scene of his slumber.
The coachman noticed with satisfaction the
force of the demands of his clansmen.

Imagine the joy of the poor family. JAQUES
had remained seated, incapable of any
first time the destitution of the little family.

Ten thousand livres!" cried he, having urged
"Eight hundred," said a broker.

A hundred livres!'

The preacher stopped; with a hundred livres
he would have bought the scene of his slumber.
The coachman noticed with satisfaction the
force of the demands of his clansmen.

Imagine the joy of the poor family. JAQUES
had remained seated, incapable of any
first time the destitution of the little family.
